

## Circles and Triangles Vocabulary

2-D Shapes	A 2-D shape is a flat shape, like a drawing on a piece of paper. It doesn't have any thickness or depth.
Triangle	A 2-D shape with 3 straight sides and 3 corners.
Circle	A 2-D shape that goes round and round and doesn't have any edges or corners.
Round	A smooth, curved line that doesn't have any edges or corners.
Straight	A line that doesn't bend or curve.
Sides	The edges of a 2-D shape.
Corners	The point where two sides meet on a 2-D shape.
Size	How big or small something is.
Big	Something that is large or very large.
Small	Something that is little or tiny.
Where?	The place or location that an object is.
On	When something is resting or touching the top of something else.
In	When something is inside or within another thing.
Behind	When something is at the back or rear of something else.
Between	When something is in the middle of two other things.
Beside	When an object is next to another object.
In front of	When something is right ahead of another object, we say that it is 'in front'.
Around	Moving in a circular way or moving from behind an object to in front of an object.
Through	Moving from one side of something to the other.
