

## Shapes with 4 Sides Vocabulary

2-D Shape	A 2-D shape is a flat shape, like a drawing on a piece of paper. It doesn't have any thickness or depth.
Square	A 2-D shape with 4 equal, straight sides and 4 corners.
Rectangle	A 2-D shape with 4 straight sides, two longer and 2 shorter, and 4 corners.
Straight	A line that doesn't bend or curve.
Sides	The edges of a 2-D shape.
Corners	The point where two sides meet on a 2-D shape.
Size	How big or small something is.
Big	Something that is large or very large.
Small	Something that is little or tiny.
Shorter	Something that is not as long as something else.
Longer	Something that extends more than something else.
Equal	Something that is the same. The sides of a square are equal because they are the same length.
Day	The time from when the sun rises and you wake up to the time when the sun sets and you go to sleep.
Night	The time from when the sun sets and you go to sleep, to the time when the sun rises and you wake up.
Morning	We wake up in the morning. It is morning until lunchtime.
Evening	When we have dinner and get ready for bed. It usually gets darker in the evening.
Afternoon	The time between having lunch and when the sun starts to go down.
Today	Today is the whole time from when you wake up to when you go to bed.
